EDUCATION

California Polytechnic State University
B.S. Graphic Communication

San Luis Obispo, CA
Sept. 2025 – May 2029

EXPERIENCE

Experience Designer

Oct. 2026 – Present

CodeBox – Student Software Engineering Club

San Luis Obispo, CA

- Serve as a UX Designer for a club that ships student-led web apps, mobile apps, and AI tools; responsible for owning the UX process for my team's product, from user research and problem definition to prototyping, usability testing, and high-fidelity design
- Conduct user research by talking to students on campus to identify the issues they face and define the problems worth solving
- Create Figma wireframes and reusable components and make code edits on GitHub to help bring my designs to life; currently building hands-on skills in Figma, GitHub, and development workflows ahead of project kickoff

Hack4Impact Cal Poly

San Luis Obispo, CA

Associate Director of Design

Aug. 2026 – Present

- Coordinate designers across nonprofit technology project teams as an executive board member by supporting design operations
- Developed this year's chapter design system, aligned with Hack4Impact's brand identity, and designed promotional posts that increased impressions by **12%** and viewers by **30%**
- Shaped the incoming design team by interviewing candidates and contributing to designer selection and team placement

UX Designer, Operation Surf

Jan. 2026 – Present

- Designed a volunteer and administrative portal that matched the client's needs by turning user and stakeholder research into user flows, wireframes, and interactive prototypes, working with a team of 14 designers and engineers
- Improved on-site task efficiency by **5%** (per client feedback from on-site prototype testing) and won admin preference for the updated version through better sorting, a cleaner layout, and a group email feature
- Reduced admins' on-site workload with the group email feature, which the client singled out as especially valuable

Graphics & App Designer

May 2026 – Present

Center for Health Research, Cal Poly (NIH-funded projects)

San Luis Obispo, CA

- **ReadyMoms:** Redesigned a research-focused mobile app for pregnant participants as the sole designer, delivering end-to-end UX (user flows, wireframes, and high-fidelity screens in Figma) while collaborating with researchers, a project manager, and a developer
- Built an accessible design system with reusable components, a logo, and **~20** custom icons, creating a cohesive visual identity across the entire app
- Reduced average module interaction time from **20 to 12 minutes** by cutting text and adding more interactivity and visuals
- Converted a library of **60+** graphics to SVG for easier integration into the app, and edited **~12** module videos with motion graphics, animations, and accessibility features to make content easier to understand
- **Pathways to Health:** Created online and print graphics that turn detailed health information into clear, approachable visuals matched to the project's audience

Student Graphics Intern

Jan. 2026 – Apr. 2026

Cal Poly Athletics – Stunt

San Luis Obispo, CA

- Delivered **25+** game-day, statistical, and real-time result graphics under tight deadlines by collaborating with a 7-person creative team to keep every asset brand-aligned

Multimedia Design Intern

Oct. 2025 – Jan. 2026

Presso

Remote

- Increased website engagement by **8%**, impressions by **6%**, and post reactions by **10%** by designing 20+ marketing assets, producing promotional videos, and managing WordPress and social content

PROJECTS

Wellfed – Designathon Winner | *UX Fest SLO 24-Hour Designathon*

Jan. 2026

- Won a 24-hour designathon by collecting **68 survey responses in 3 hours** and synthesizing the insights into Wellfed, an interactive app that helps young adults build lifelong cooking skills

SKILLS

Design: Figma, Prototyping, Design Systems, Visual Design, Accessibility (WCAG)

Research & UX: User Research, Surveys, User Flows, Information Architecture, Wireframing, Usability Testing

Adobe & Media: Photoshop, Illustrator, InDesign, Premiere Pro, Canva, Blender

Dev & Tools: HTML, Python, Java, MySQL, GitHub, WordPress, AI Vibe Coding (Figma Make, Lovable, ChatGPT)
